

## WALL SCONCE LIGHTING GUIDE

When it comes to wall sconce lighting, finding a reliable lighting company can be difficult.

We at Butler can help you find lighting for nearly every facet of your home lighting experience. Including indoor and outdoor sconce lighting.

### BUDGETING

#### SMALL BUDGET

A small budget is defined as being less than \$1000. When working with a small budget try to spend it on security, and curbside appeal.

#### MEDIUM BUDGET

A medium budget is defined as being between \$1000 and \$5000. With a larger budget, one should shift their focus to creating a more decorative or elaborate interior or outdoor setting.

#### LARGE BUDGET

A large budget is defined as being over \$5000. When working with a large budget you can have a larger focus on quality, beauty, size, and materials.

### WALL SCONCE LIGHTING TYPES

There are many different design types available for wall sconces, and the best choice for your home will depend on your personal style and the decor of the room space where the sconces will be installed. For example:

**METROPOLITAN**  
Metropolitan I N2921-1-77 I

Ceramic  
Warmth

### HOW TO INSTALL

-  Measure the height of the wall sconces and plan their layout on the walls according to the manufacturer's instructions and local building codes.
-  Collect the necessary tools and materials, including a drill and mounting hardware, ensuring you have the correct equipment provided by the manufacturer.
-  Before starting the installation, turn off the power to the circuit where the wall sconces will be installed for safety.
-  Attach the mounting bracket to the wall using the provided hardware. Connect the wiring from the wall to the sconce, stripping the wires and using wire nuts to connect them appropriately.
-  Attach the sconce to the mounting bracket with the provided hardware. After installation, turn the power back on to test that the wall sconces are working correctly. If you lack comfort or experience with electrical work, consider hiring a professional electrician for a safe and expert installation.

### ENERGY COSTS

Energy costs are an important factor to consider when selecting wall sconces for your home. The cost of operating sconces can vary depending on several factors, including the type of light bulbs you use, the intensity of the lights, and how often the lights are used. One way to reduce the energy cost with wall sconces is to choose energy-efficient light bulbs, such as LED or CFL, which use less energy and last longer than traditional incandescent bulbs.

### WHY BUTLER?

We at Butler work with over 150 vendors to and we can handle any lighting job you can throw at us. If you have a lighting job, or a job that requires fans that needs to be finished contact us today, and we'll take your lighting to the next level.

### WALL SCONCE FAQs

#### How do I choose a wall sconce?

When choosing a wall sconce, there are several factors to consider such as size, function, placement, lighting, design, features, and energy efficiency. First, consider the placement of the sconce in relation to other furniture and decor in the room.

#### What size wall sconce should I buy?

Wall sconces should be in proportion to the size of the room. A large sconce may require a larger sconce. However, you need to consider the placement in relation to other furniture and decor in the room.

#### Where should wall sconces be placed?

Wall sconces can be placed in various locations in a room, depending on the desired lighting effect and the layout of the space. It's important to remember that wall sconces should be installed at eye level or slightly above to avoid glare and to provide the right amount of light.

#### Should you match your sconces with your chandelier?

It's not necessary to match wall sconces with a chandelier, but it can be a good idea to coordinate the styles and finishes to create a cohesive look in the room. The sconces and chandelier can be in the same style and finish.

#### How do I maintain and clean wall sconces?

To maintain and clean wall sconces, follow the manufacturer's recommendations for cleaning and care. This may involve dusting the light heads and shades regularly, using a soft, dry cloth to wipe away dirt or fingerprints, and replacing light bulbs as needed.
